Pune, India

Summary

Result-driven Information Technology graduate with hands-on internship experience engineering full-stack applications and n8n automations. Proficient in the MERN stack, Next.js, LangChain, and RAG architectures. Adept at frontend debugging, building robust REST APIs, and applying agile best practices.

Education

Bachelor of Engineering in Information Technology | 8.30 CGPA 2022 – 2026 | Pune, India
International Institute of Information Technology

HSC | 86.50%, Matoshri Shantabai Govindrao Sonawane Junior College 2019 – 2021 | Andarsul, Maharashtra

SSC | 89%, Matoshri Shantabai Govindrao Sonawane English School 2018 – 2019 | Andarsul, Maharashtra

Work Experience

Vara Tech, Software Developer Intern 11/2025 – 05/2026 | On-site

- **Architected** end-to-end workflow automations using n8n while maintaining clear technical **documentation** for **scalable** enterprise systems.
- **Collaborated** within cross-functional teams to integrate CRM systems, REST APIs, and AI services.
- **Reduced** manual operational effort by **70%** through automated data pipelines.

Hanumatrix, Frontend Developer Intern 07/2025 – 10/2025 | Remote

- **Identified and debugged** critical frontend issues across existing React.js web pages to ensure error-free code execution.
- **Executed frontend debugging** and optimized layout styles for cross-device responsiveness following industry **best practices**.

Technical Skills

Programming Languages: C++, Java, TypeScript, JavaScript, SQL

Frontend Technologies: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend Technologies: Node.js, Express.js, REST APIs, Socket.IO

Databases: MongoDB, MySQL

AI & Automation: LangChain, RAG, AI Agents, n8n, OpenAI API, Gemini API

Developer Tools & DevOps: Git, GitHub, Postman, VS Code, Google Cloud Platform, CI/CD

Core Concepts: Data Structures & Algorithms, OOP, DBMS

Projects

Online Learning Management System, Technologies: React.js, Node.js, Express.js, MongoDB, Gemini API

- **Engineered a full-stack learning platform** using React.js and Node.js, integrating the **Gemini API** to dynamically generate customized course content based on user prompts.
- **Designed an optimized MongoDB schema** utilizing referencing and indexing to manage relational data, ensuring fast query execution and efficient user state management.
- Built robust **REST API** endpoints in **Express.js** to handle user registration, course creation workflows, and secure payload delivery between the frontend and database.

Agrimitra – Fertilizer Recommendation System,

Technologies: Python, Flask, Machine Learning, RAG, LangChain, LLMs, NLP

- **Developed an ML solution** utilizing **regression** models to provide accurate, data-driven fertilizer recommendations for farmers.
- **Utilized Python and Flask** to deploy an NLP chatbot integrating LLM frameworks and text embedding via LangChain.
- **Resolved** low recommendation accuracy by executing model **tuning** and **validation** to ensure high-**performance** system **monitoring**.

Achievements and Leadership

- **Secured TFWS merit seat** at I2IT Pune with **95.5 percentile** in MHT-CET. | 2022
- **Earned LeetCode 50-Day Badge** for consistent algorithmic problem-solving. | 2025
- **Finalist** in **Seed Global Hackathon**, recognized for structured problem-solving. | 2025
- **Web Team Lead** at **ACM College Committee**, mentoring juniors and managing events. | 2024 – 2025
